I am writing to inform you of a problem that we have in our community and all over the world. This problem is Animal Cruelty!

The problem with animal cruelty is that people are so selfish and ignorant that they use other species of life for their unessential needs. Animals are a part of life that has feelings too, and no creature should be tortured that way they are. Just think about this situation and how they make you feel about they torture these animals go through everyday! Researchers coop animals up in tiny cages until they're needed. They strap bunny rabbits in a tube and clamp open their eyes to pour poisonous liquids in their eyes to see how it reacts. They tie monkeys to a chair and send electric currents through their body. This is cruel and unusual punishment that no one should suffer. How would you feel if you were that animal?

The cause of this problem is people in this society are too greedy and selfish to think about how these innocent creatures must feel. They think it's "fun" to poison animals and watch them break into convulsions. People will do anything for money these days, even if it includes hurting another species.

It affects people because it shows that they are willing to put another creature in pain for their unessential products. It makes me feel very sad and depressed that people are so selfish that they take another animals life away. How could people actually "want" to do this for a living. If it's so important to researchers then they should test on themselves because they're the ones that should be cooped up in cages.

There should be laws to protect these animals from being tested on. This cruelty and brutality has to stop! If one company can research with computer technology as an alternative then all companies can. I think that until people are willing to donate their body or money that they should be tested!

I also feel that criminals on death row

should be tortured instead of the animals because they criminals need to pay for their crimes. If people can not respect animals feelings, then how can they respect themselves? Something needs to be done to stop this brutality and I'm going to make sure something does.

Kelly Kehne

Congratulations to Kelly Kehne

A message to people all around the world for peace, unity, and respect for all forms of life. Wildlife, marine life, beloved pets, dog, cats, monkeys, rabbits, deer, birds and mice, etc.

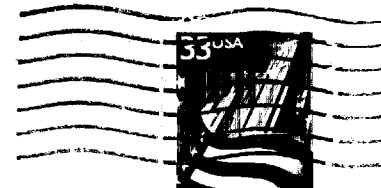

All are innocent and completely helpless to human cruelty all animals are entitled and deserve to be free of torture and pain they suffer from cruel, unnecessary hospital and laboratory research and experimentation. Alternative methods available and possible, (producing equal even better results) and should be implemented immediately!

We are all responsible for providing a compassionate caring and safe environment for all animals!

A special tribute to all good people involved in, defending, implementing, and promoting animal protection laws and public awareness in these crucial issues. They set exemplary example to follow and continue.
